Career Objective

Proven expertise in python programming, Sql database, and web development. Committed to staying updated on emerging technologies and dedicated to continuous learning. Seeking a challenging role as a python developer where I can leverage my skills to contribute to innovative projects and further enhance my expertise in full stack development.

Projects

☞ Developed a Dashboard For The Store's Billing

A desktop billing dashboard created with Python and Tkinter. With the help of this program, companies can effectively manage their billing procedures by creating and printing invoices, calculating totals, and storing client information.
